TOBACCO REVENUE, USE, SPENDING AND TRACKING COMMISSION ANNUAL REPORT 2004

The Tobacco Revenue, Use, Spending and Tracking Commission (TRUST) was created through the passage of Proposition 303 on November 5, 2002. Proposition 303, in addition to the levy of an additional tobacco tax, reaffirmed existing statutory language (A.R.S. section 36-772) authorizing the Arizona Department of Health Services' (ADHS) administration of a portion of tobacco tax funds for tobacco education and prevention. Proposition 303 also created a new program, the Chronic Disease Fund and allocated 2% of the new tobacco tax dollars to this fund. The TRUST commission was formed as an advisory oversight board for both the Tobacco Education and Prevention Program (TEPP) and Chronic Disease Fund providing advice to the ADHS Director. In the letter of establishment, the TRUST Commission is requested to submit an annual report of its activities to the President of the Senate and the Speaker of the House of Representatives in July of each year.

On August 13, 2003 the Arizona State Legislature, through the office of the Speaker of the House and the Senate President, officially established the TRUST commission and appointed the original eight members. (Attachment A) The representation on the Commission is in concert with the categories articulated in Proposition 303.

The Commission convened four times during the past fiscal year 2004 – November 19, 2003, January 27, 2004, April 15, 2004, May 17, 2004 - and once during the current '05 fiscal year on July 14, 2004. (Attachment B) The Commission prepared and submitted a Common Purpose Statement, TRUST Commission Values / Ethics Statement, and By-Laws to the Director for approval (Attachment C). A chair and vice-chair were selected as well as a Nominating Committee established for future member appointment. During this initiation period, two members submitted their resignation. (Attachment D)

The Commission structured the agendas to begin educating its membership about the Tobacco Education and Prevention Program, to provide guidance to the initial dispersal of chronic disease funds through a Request for Proposal process and to comply with the state requirement of ethics training for its membership. A manager of the chronic disease fund was appointed in January 2004 and the Request for Proposal was issued in late January 2004. Nine proposals were selected by review committees comprised of internal and external representation, and \$1,848,834 total funds were awarded to a variety of community-based organizations and partnerships in May 2004.

Projects to be undertaken by the TRUST commission during the current fiscal year include a comprehensive review of the TEPP program, monitoring of the Chronic Disease Funds and its first year grantees, recruitment and recommendation of new Commission members, participation in a strategic planning process for both programs and guidance for TEPP's legislative report due November 15, 2004.
